CAPITA

Machine v. Human

Enabling an Authentic Workforce For Improved Productivity and Engagement

Who are we?

Lee Johnson Head of HR Consulting

Prior to joining Capita to establish and lead the HR Consulting Practice, Lee was a Global HR Director for a number of organisations including Biwater Plc, Croda Plc (FTSE 100), Premier Oil (FTSE 250), Lonmin Plc (FTSE 100) and has worked for other firms such as Shell Plc (FTSE 100), Network Rail and Ericsson. Lee has worked in Europe, Africa, Asia Pacific, North America, Australia, the Middle East and Latin America.

Lee has achieved FCIPD, B.Com, B.Econ, IOSH & NEBOSH Quals and is currently completing his Masters in Behavioural Economics.

Doug Brown Chief Data Scientist

Doug has extensive practical experience of delivering award winning digital transformation projects gained from working at IBM, EY (Partner) and start-ups both in Europe and the US.

Doug has held a variety of senior management, partner and executive consultancy/ programme roles. Doug has achieved ACII, MSc and MBA qualifications as well as lecturing at Cranfield University. Doug's motivation is to deliver disruptive and differentiating data driven propositions to both educate and delight our customers

Wil work for FREE

The rise of humans

Future Employees

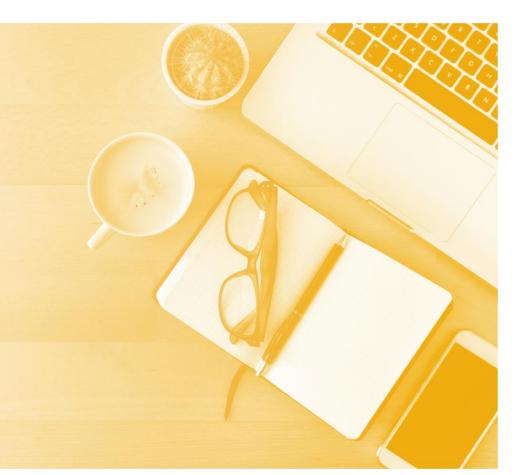

The factory of the future will have only two employees, a man and a dog.

The man will be there to feed the dog.

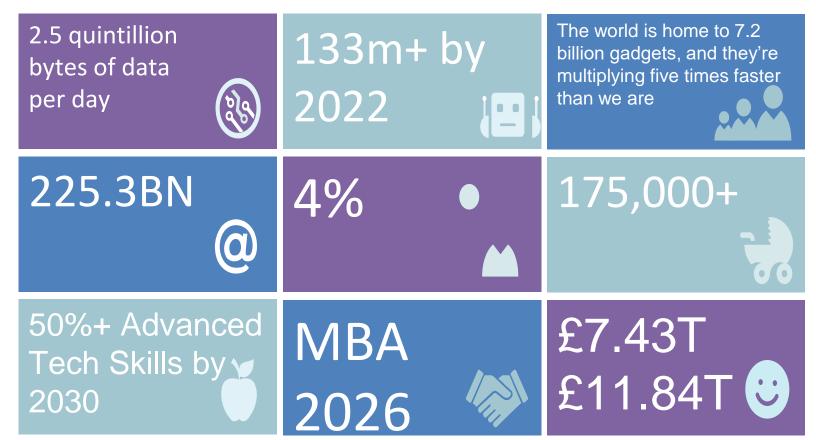

The dog will be there to keep the man from touching the equipment

Warren G Bennis

Work today is more diverse, dynamic, and distributed than ever before

Question?

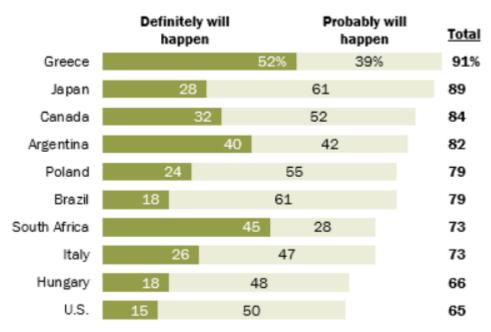

As an ex HRD, and from talking to executive colleagues, there are a few observations I would like to share:

- At board level 85% of executives want to invest more in Al
- Simple Linear Algorithms have been proven to out perform human judgement e.g. 86% of healthcare life science and technologies companies in the healthcare market re using AI today

Are you fearful or insecure about the future of your job?

Many think that robots and computers will take over many jobs now done by humans

How likely do you think that in the next 50 years robots and computers will take over many jobs now done by humans?

Business Functions where AI has been adopted, by industry

| | Service operations | Product and/or service development | Marketing and sales | Supply-chain management | Manufacturing | Risk | Human resources | Strategy and corporate finance |
|----------------------------------|--------------------|--|---------------------|-------------------------|---------------|------|--------------------|--------------------------------------|
| Telecom | 75 | 45 | 38 | 26 | 22 | 23 | 17 | 15 |
| High tech | 48 | 59 | 34 | 23 | 20 | 17 | 21 | 17 |
| Financial services | 49 | 26 | 33 | 7 | 6 | 40 | 9 | 14 |
| Professional services | 38 | 34 | 36 | 19 | 11 | 15 | 16 | 11 |
| Electric power and natural gas | 46 | 41 | 15 | 14 | 19 | 14 | 15 | 14 |
| Healthcare systems and services | 46 | 28 | 17 | 21 | 9 | 19 | 18 | 13 |
| Automotive and assembly | 27 | 39 | 15 | 11 | 49 | 2 | 8 | 6 |
| Travel, transport, and logistics | 51 | 34 | 32 | 18 | 4 | 4 | 2 | 3 |
| Retail | 23 | 13 | 52 | 38 | 7 | 9 | 8 | 0 |
| Pharma and medical products | 31 | 31 | 27 | 13 | 28 | 3 | 6 | 4 |

Al and Human Relationships

Human behaviour and interaction can be difficult to replicate via self learning

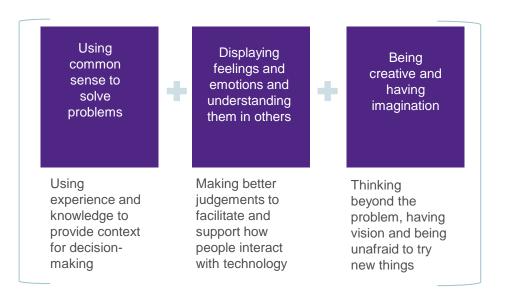

Amazon scraps 'sexist Al' recruiting tool that showed bias against women

Microsoft unveiled Tay: It took less than 24 hours for Twitter to corrupt an innocent Al chatbot.

Can employees still be their authentic selves in a digitally driven workplace?

Three Things that Humans can do that Robots cannot

These things become richer with workforce diversity, openness and a culture that supports people to bring their 'authentic selves' to work.

"The difference is that humans can participate in the social process of creating knowledge, while machines can only apply what has already been discovered"

Deloitte, 2017 "Reconstructing Jobs: Creating good jobs in the age of artificial intelligence"

Human intervention: Essential or recipe for disaster? How to keep the human touch as part of your company culture

Al should support people in work, not replace them completely. Al should not rob people of control

Managers need to make this clear and help introduce and embed AI sensitively

Your people need to understand the value of their skills over Al....

...and they need to be encouraged to develop these skills

People need to be developed to understand the significance of the data

They need to oversee the machines and not be afraid to challenge when things go wrong

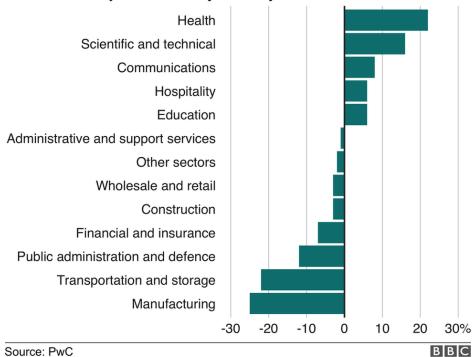

People need to be trained to undertake more sensitive tasks that require judgement and empathy

Inevitably, some jobs will be displaced, some will change and new roles will emerge.

How Al could change the job market

Estimated net job creation by industry sector, 2017-2037

Inevitably, some jobs will be displaced, some will change and new roles will

emerge

21st Century Skills

These skills, abilities and types of knowledge are used heavily in occupations that have the best chance of growing.

Top Social Skills

- Instructing: Teaching/Instructing
- Co-Ordination: Assessing others' performance
- Monitoring: Adjusting to others' actions
- Management: Motivation

Top Cognitive Skills

- Fluency of Ideas: Teaching/Instructing
- Originality: Novel Solutions
- Active Learning: Understanding new information

Nesta – Top 20 Skills, Abilities and Knowledge

Skill Ability Knowledge

| 1. Judgement and Decision Making | | | | | |
|-----------------------------------|--|--|--|--|--|
| 2. Fluency of Ideas | | | | | |
| 3. Active Learning | | | | | |
| 4. Learning Strategies | | | | | |
| 5. Originality | | | | | |
| 6. Systems Evaluation | | | | | |
| 7. Deductive Reasoning | | | | | |
| 8. Complex Problem Solving | | | | | |
| 9. Systems Analysis | | | | | |
| 10. Monitoring | | | | | |
| 11. Critical Thinking | | | | | |
| 12. Instructing | | | | | |
| 13. Education and Training | | | | | |
| 14. Management of Pers Resources | | | | | |
| 15. Co-ordination | | | | | |
| 16. Inductive Reasoning | | | | | |
| 17. Problem Sensitivity | | | | | |
| 18. Information Ordering | | | | | |
| 19. Active Listening | | | | | |
| 20. Administration and Management | | | | | |

The changing role of HR | Challenges

As globalisation, economics and technology continue to transform the business environment, organisations will lean ever more on their HR leaders to drive successful change management and to deliver more with less.

However:

- Activities, not occupations: Rather than replacing entire jobs, robots will automate particular tasks within those jobs.
- · Consciousness vs. Control
- · Ethical Tourette's
- Super Human Resources
- We may not be replaced but we need to replace our thinking
- Al Value 'Augmented Humanity'

HR industry challenges

- Benefits, pay and rewards
- Employee engagement
- Recruitment and staff retention
- Employee wellbeing and mental health
- Technology
- Cyber breaches and data security
- Workforce planning
- Legislation
- Diversity and inclusion
