Fuzzy & Fluffy

What would you like to know?

What we are going to cover.....

What are the challenges facing employers?

Why I am doing this?

How can data help?

Where can I find data to use?

What does good look like?

Health & Benefits: The big challenges facing employers today

Increasing absence, health and benefits costs

Employee health concerns as 'lifestyle' related illness are increasing exposure to claims

Will the responsibility for employee health and provision continue to shift from the State to employers?

How do I engage more with a multi-generational workforce and get recognition for my Employee Value Proposition

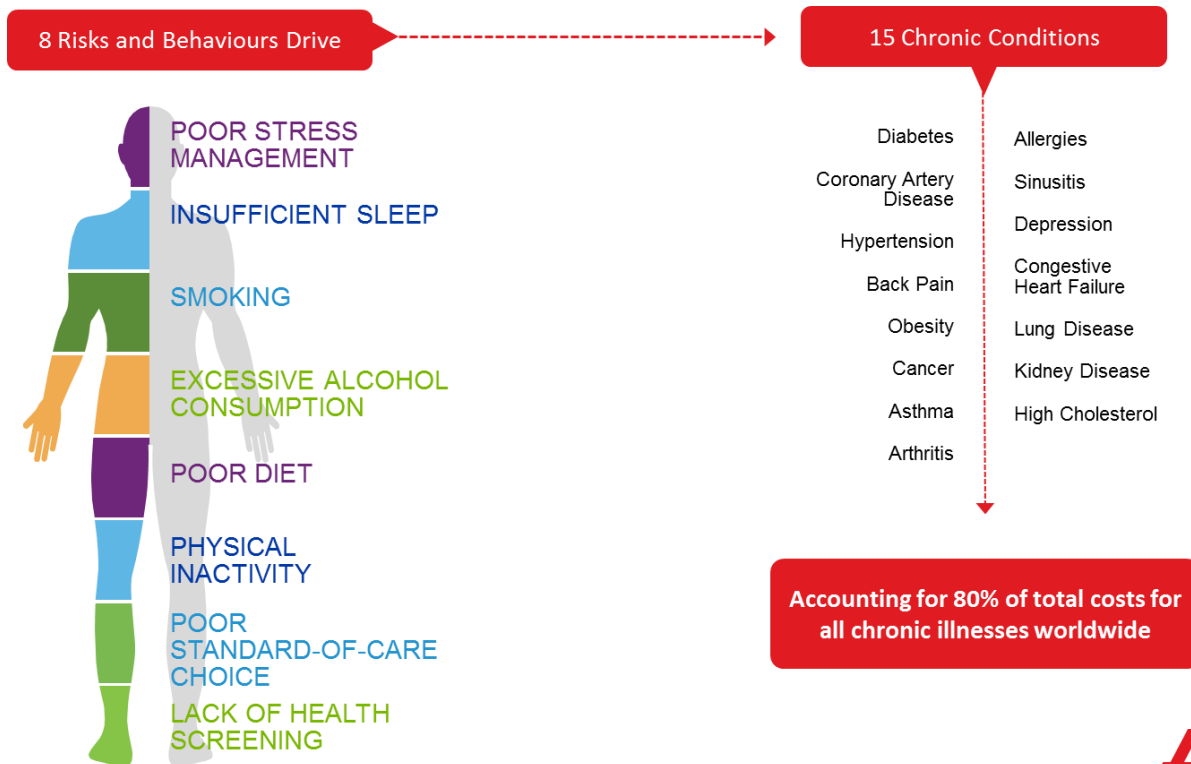

What is the most effective way for my employees to access the healthcare system, particularly for the key health conditions: Mental Health, Cancer, MSK and Heart

Lots of good data, how do I use this and truly integrate my approach to health and benefits?

The key health risk behaviours that drive ill-health costs

Source: World Health Organisation

What should a complete Wellbeing strategy encompass

What are clients telling us?

Only 25% currently use data but 40% plan to

59% do not understand the impact of ill-health

70% plan to start measuring this soon

59% do not measure on ROI... but would like to

Health & Wellbeing: What are you trying to achieve?

Tick a box

Fewer insurance claims

Sustainable insurance costs

Reduce absence costs
